

Abstract

Use of *Nocardia Rubra* cell wall skeleton preparation for the treatment of cervical erosion and the process thereof

This invention relates to a biological preparation, especially *Nocardia Rubra* cell wall skeleton preparation. After cultivating, collecting thallus, cell fragmentation, purifying enzyme, removing the grease, the final preparation containing *Nocardia Rubra* cell wall skeleton is obtained by dispensing, lyophilizing and filling. The invented preparation has marked effect to adaptable diseases, healing rate is 88%, total validity rate is 100%. This external preparation shows harmless, safe, non-toxicity and easy to be used with little side effect and lower cost.
